Congratulations on your pregnancy! If you have any questions, beyond those answered below, please feel free to ask the sonographer performing your exam. Our desire is to make this a positive experience while at the same time providing the best care to you and your baby.

**Is ultrasound harmful to my baby?**
Ultrasound is a specialized exam using sound waves (not x-rays) to visualize your baby. No radiation is involved. To learn more please visit The American Institute of Ultrasound in Medicine.

**Can I have a digital recording of my baby?**
Digital recording for nondiagnostic purposes is not performed; however, keepsake still images of your baby will be provided. Please be aware that fetal position may limit our ability to obtain optimal keepsake images.

**Can I have a 3D ultrasound of my baby?**
We do not have 3D/4D ultrasound machines at this time. In most medical facilities they are reserved for cases in which there is a known suspected fetal abnormality. The Food and Drug Administration (FDA) cautions against the use of 3D/4D imaging for entertainment purposes.

**Can I take pictures or videotape in the ultrasound exam room?**
No type of photography or video recording (including cell phones) is allowed in the exam room at all by you or your family members. In consideration of others, please turn off you cell phones while in the ultrasound department. We ask that any texting or phone calls please be made from the lobby once the ultrasound exam is completed.

**Are childcare services available?**
No, we do not have childcare services on site. If you must bring a young child with you, please bring someone to care for the child while you are having the exam.

**How many people can I bring in to watch my ultrasound exam?**
We ask you to please limit the total number of guest to a total of four including young children. We understand this is an exciting time for you and your family, but ask that you respect this is a medical test. We are here to provide you the best medical care possible and that means that we need to be able to concentrate and do our job to the best of our ability.
